Methodological notes

In accordance with the Law of the Republic of Kazakhstan “About Education”, educational levels are established: Preschool education and training, primary education, basic secondary education, secondary education (general secondary education, technical and vocational education), post-secondary education, higher education and postgraduate education.

Statistical information on pre-school education and training, primary, basic and general secondary education is compiled by the Ministry of Education of the Republic of Kazakhstan.

Preschool education and training - the first level of the continuous education system. General educational curricula of preschool education and training at this level ensure the continuity and continuity of preschool and primary education, taking into account the principle of unity of upbringing and education, development and improvement of children and precede the level of primary education.

Preschool organization - an educational organization that is created to meet the needs and needs of the family in caring for children, their harmonious development based on general cultural, national values, preparing the child for the primary stage of secondary general education, creating the necessary conditions for parents to continue their work and study, active participation in public life.

Preschool education of children is carried out in the family or from one year to admission to the 1st grade in preschool organizations.

Preschool organizations are divided into types: nursery, nursery-kindergarten, kindergarten, mini-center.

The provision of seats for children in preschool organizations (there are children per 100 seats) is determined by the ratio of the number of seats in preschool organizations to the number of children in them.

A general education school - an educational institution that implements general education curricula for primary, basic secondary and general secondary education, as well as curricula for additional education for students and pupils.

The general education school is the main link in the system of continuous education and provides all citizens of Kazakhstan with the opportunity to implement the Law guaranteed by the Government to receive free general secondary education within the Government standards.

General educational organizations carry out the educational process in accordance with the educational programs of three levels of education: primary education (grades 1-4), basic secondary education (grades 5-9), general secondary education (grades 10-11 (12)).

Educational organizations of technical and vocational education (specialized school, college) - organizations that implement professional programs of technical and vocational education aimed at training qualified workers and mid-level specialists in the main areas of socially useful professional activity).

Organizations of higher and (or) postgraduate education - higher educational institutions that implement educational programs of higher and (or) postgraduate education and carry out research activities.

Doctoral studies - postgraduate education, educational programs of which are aimed at training personnel for scientific, pedagogical and (or) professional activities, with the award of the degree of Doctor of Philosophy (PhD), Doctor in profile.

The number of educational institutions includes the total number of general education schools, educational institutions of technical and vocational education, organizations of higher and (or) postgraduate education.

The gross enrollment ratio of children in preschool education and training is defined as the ratio of the number of children, regardless of age, in preschool organizations (kindergartens and minicenters) and preschool classes of schools, to the total population aged 0-6 years.

The net enrollment ratio in primary education is defined as the number of students in the 7-10 age group studying at that level, expressed as a percentage of the total population for that age group. The gross enrolment ratio of tertiary education is defined as the ratio of the number of students, regardless of age, studying in organizations of technical and vocational education and organizations of higher and (or) postgraduate education, to the total population aged 18-22 years.
