**Spreadsheets :**Industrial activity of households in the Republic of Kazakhstan**3. Glossary**

A household is an economic entity consisting of one or more individuals living together, pooling all or part of their income and property, and consuming goods and services in common.

Household production - the value of goods, products and services resulting from the production activities of households in the reporting period, intended both for own consumption and for sale.

The production of goods, products and services is accounted for in kind and value terms at sales prices.
