S.2 Introduction-Relevance

This statistical observation relates to the healthcare industry. The statistical form is compiled on the basis of data from the primary accounting records of healthcare organizations. The information on the items of income and expenses indicates current income - the receipt of financial resources, calculated according to the methodology of the financial statements of organizations, received from the provision of services that are not included in the list of the main type of activity, and the production of goods produced as a result of the activities of this organization and sold at market prices (excluding value added tax (hereinafter - VAT), as well as those produced for own consumption or gross capital formation, including those transferred to households free of charge or at insignificant prices. The receipt of funds includes indicators characterizing the availability and sources of financing of the organization: budget receipts (republican, local), under contracts with organizations (enterprises) or funds of the population, income from the rental of premises, equipment and others.
