S. 2 Introduction-Relevance

Structural statistics are annual statistics, the purpose of which is to provide data on the financial and economic activities of enterprises (industry, construction, trade, transport, communications and services) in the context of regions and types of activity. The main tasks of structural statistics are to characterize the volume of entrepreneurial activity, the structure of the production system, to form an information base for calculating individual macroeconomic indicators, as well as to characterize the demography of enterprises and update the statistical business register.

Currently, structural statistics are based on statistical observations of the financial and economic activities of enterprises using unified reporting forms that meet the international requirements of the System of National Accounts (hereinafter referred to as the SNA) and national financial reporting standards.

An important feature of any enterprise is that it has separate property (non-current and circulating assets), which provides the material and technical ability of its activities, economic independence, reliability and solvency. Successful operation is possible with the effective use of all property, and primarily fixed assets. Fixed assets often constitute the main part of the assets of an enterprise (company) and are involved in many areas of entrepreneurial activity. The Committee on Statistics conducts nationwide statistical observation in accordance with Form 11 "Report on the state of fixed assets". In particular, indicators formed on the basis of statistical observation on the state of fixed assets of enterprises are used:

- 1) in calculations for the System of National Accounts (SNA);
- 2) government agencies and businesses for economic settlements;
- 3) for monitoring target indicators of state programs.

Feedback from users is carried out through the blog of the Minister of National Economy of the Republic of Kazakhstan on the website of the Ministry of National Economy of the Republic of Kazakhstan www.economy.gov.kz.

The Bureau of national statistics of the Agency for strategic planning and reforms of the Republic of Kazakhstan holds meetings of working groups (focus groups), with the participation of potential users and respondents, representatives of interested government agencies, as well as NPP Atameken, at which indicators of national statistical forms are analyzed in detail for their relevance and the elimination of duplication with indicators of departmental statistical forms and forms of administrative data.

S.4 Presentation of statistical information

S.4.1 Data description

The quality report was drawn up for the annual statistical survey in accordance with Form 11 "Report on the state of fixed assets". The main indicators on the availability and condition of fixed assets of enterprises of the Republic of Kazakhstan are presented in value terms for the reporting year in the context of regions and types of economic activity.

S.4.2 Classification system

When conducting a survey in accordance with Form 11 "Report on the state of fixed assets", statistical classifications are of great importance. Their application affects the comparability of the information collected with the data of other statistical surveys and its quality.

When conducting a survey according to the above form, the following statistical classifiers are used:

KATO - Classifier of Administrative Territorial Objects; OKED - General classifier of types of economic activities;

KFS - Classifier of forms and types of ownership;

KRP - Classifier of the dimension of legal entities;

KOPF - Classifier of organizational and legal forms of management; CSE - Classifier of sectors of the economy;

SOF - Directory of fixed assets.

(posted on the website of the Bureau of national statistics of the Agency for strategic planning and reforms of the Republic of Kazakhstan www.stat.gov.kz in the "Classifiers" section).

S.4.3 Sectoral coverage

The survey covers enterprises in the financial and non-financial sectors of the economy.

S.4.4 Statistical concepts and definitions

1) Type of observation - continuous;

2) Collection tools - the statistical form of the national statistical observation "Report on the state of fixed assets" (index 11, frequency - annual) and instructions for filling out the statistical form of the national statistical observation "Report on the state of fixed assets" (index 11, annual frequency), approved by order of the Chairman of the Bureau of national statistics of the Agency for strategic planning and reforms of the Republic of Kazakhstan dated November 10, 2017 No. 165.

3) Submission deadline is April 15 (inclusive) after the reporting period.

S.4.5 Statistical object

Legal entities engaged in entrepreneurial activity with a payroll number of employees over 100 people and (or) their branches and representative offices, regardless of the number of employees. In addition, they represent state (budgetary) institutions, healthcare and education organizations, banks, insurance companies, enterprises operating in the field of law, a unified accumulative pension fund, public funds, public associations - regardless of the number of employees.

S.4.6 General population (principle of selection of survey units)

The source for determining the general population is the Statistical Business Register, which includes information on legal entities registered in the Republic of Kazakhstan and their separate and structural divisions.

The main criteria for the formation of the general population are:

Activity sign (ACT) - 1 (active), 2 (temporarily suspended activity);

General classifier of economic activity (OKED) - 01-94.20.0, 94.92.0-96.

S.4.7 Territorial coverage

Republic of Kazakhstan (all regions, cities of republican significance, the capital)

S.4.8 Time coverage

Form 11 statistics have been generated and published since 1995.

S.4.9 Base period
